

10 Reasons to use Re-flow

...OR HOW USING RE-FLOW CAN SAVE YOU A TON OF TIME, MAKES YOU AND YOUR WORKERS MORE EFFICIENT AND SAVES YOUR BUSINESS MONEY!

1 Increase productivity!

There's no doubt that Re-flow increases productivity in your workforce. It's simply because your entire team save time on admin, so have more time for the job at hand. This is because all the documentation they need is at their fingertips, repetitive tasks are automated, and completing forms is much easier.

2 No more writing up submitted data

If you are using paper, you are probably spending a lot of time typing up data that's come back from your field staff. Re-flow puts an end to this! It's all available digitally in the dashboard.

3 You no longer need to chase down forms!

Forms get completed on the worker's device, and on submission, instantly get pushed into the cloud so they can be viewed by you on the dashboard. You can even see when forms are half finished.

4 Interpretation problems?

If you are still using paper, I bet you often get forms back from your field workers which make no sense at all? With Re-flow, there's no interpretation problems anymore. Forms are digitally completed on the app, and where possible, staff choose from pre-populated dropdowns.

5 Accountability

Re-flow lets you see who completed what and when it was done in the field and across your management team. Because every job is user based, you can even see who assigned jobs or updated information in the back office. You have a perfect audit trail across your workflow.

6 Improve customer satisfaction

You are going to be more productive because Re-flow makes you more efficient. You're going to save time, and you're going to feel much more organised, with an end to end paper trail. This is going to mean a better job for your customer!

7 Reduce disputes

Every change in the admin and every action in the app is assigned to a user, so you can see who assigned a job and who updated information in the back office, you can track who completed a form, who took a photograph and who completed a task.

8 Pass your audits with flying colours!

No losing forms in the back of a van. All forms are stored in the dashboard and can be downloaded as pdfs.

9 Everything's connected

So, when you take a photograph, it's time and date stamped and connected to a job. When you mark a task as done, that's connected to a task list, which is connected to a job. When you complete a form, that's connected to a job. Everything can be tracked and found easily!

10 No more paper!

You don't need to collect it, read from it or file it...there's no more of it!
