

# Re-flow

Presents

## MANUAL Vs DIGITAL

...OR HOW USING RE-FLOW CAN SAVE YOU A TON OF TIME, MAKES YOU AND YOUR WORKERS MORE EFFICIENT AND SAVES YOUR BUSINESS MONEY!

MANUAL

Laboriously print work orders for every field worker... and then physically hand them out.

DIGITAL

Just a few clicks to set up jobs and tasks... which your staff can now instantly access on their phones wherever they are.

MANUAL

Want to add something new to your work orders once they have gone out? You have to email or send large files which get missed, don't arrive and don't get packaged with the job later.

DIGITAL

Modify details whenever you like through the live dashboard...and all the data is tied to the job forever.

MANUAL

Your staff are not completing their risk assessments or vehicle checks!

DIGITAL

A form has to be completed before the worker can move to the next task...and forms on the app are easier to complete, with most fields using dropdowns... so there are no excuses.

MANUAL

There's a lot of admin involved in annotating, marking and filing all the photos your team bring back from a project.

DIGITAL

With Re-flow, you can take pictures, annotate and add them to a project all in the app... job done!

MANUAL

Forms and paperwork are coming back covered in mud or even getting lost in the back of the truck!

DIGITAL

As soon as the worker completes the form they click send and the information is back with you at the office! The perfect audit trail.

MANUAL

The paperwork that comes back to the office has to be typed up and filed - and there's masses of it!

DIGITAL

Once it's been submitted by the worker, all the information is on the dashboard in the cloud forever... not a shred of paper in sight!
